How to Use Your Sunbehm Email

Every time we visit your property, you get one email. Here is what each button does.

No app to download. No account to set up. Everything is one tap away.

YOUR EMAIL AT A GLANCE

View Your Report

See your full report. Opens the complete write-up from today's visit, with photos of your property. The link works for **30 days** — download a copy if you'd like to keep it. Need an older one? Just ask.

Service Request

Ask us to handle something. Tell us what you need done at your property. It comes straight to Cory, and we'll follow up to confirm timing and cost before any work begins.

Pay Now

Pay securely by card. If autopay is on, you'll instead see "Autopay Scheduled" — it's already handled for you.

Manage Billing

See past invoices, update or save a card. Opens your secure billing page — your email is already filled in. Save a card here if you'd like to use autopay. We never see your card number.

Autopay: ON / OFF

Turn automatic payments on or off. Shows your current setting. Tap **turn on** (or **turn off**) beside it, make your choice, and submit — we'll email you a confirmation. Autopay needs a card saved first; add one under Manage Billing.

Leave Us a Google Review

Loved the visit? Tell others. You'll find this link at the very bottom of every email — one tap to leave a review.

See How This Email Works

New to these emails? The link at the very bottom of every email opens this guide — tap it any time for a refresher on what each button does.

PDF attachments

Save or print anytime. Your invoice and any receipts are attached to this email as PDFs. The full photo report opens with the button above — download it there to keep a copy.

Questions? Just call — we're happy to help.
